Optik Cubicle Range

WASHROOMS FOR ALL ENVIRONMENTS

Optik Cubicle Range

The attractive wet and dry cubicle solution

The Optik Range Glass cubicle system can be specified for both Shower and WC purposes, offering an attractive and stylish visual solution that only glass can. Quality stainless steel bolt through fittings and headrails in conjunction with white screen printed toughened glass panels.

Suitable for both shower and WC cubicle environments.

Door, Division and Pilaster panel elements are manufactured from 10mm clear glass and faced one side with a RAL 9010 white screen print prior to being kiln toughened at which point the paint finish fuses into the glass giving an extremely durable surface finish.

Utilising stainless steel ironmongery fixings and accessories as standard ensuring that the system stands upto the rigours of both wet and dry usage conditions.

Wall & duct panelling and fully framed vanity units can be supplied to complement this system.

The Optik range is available on a typical delivery period of 3-4 weeks from receipt of approved drawings.

Installation by Excelsior is strongly recommended but not essential as a full set of fixing instructions and technical information is provided with the system.

Ironmongery

1. Indicator Turn Bolt
2. Hinge
3. Headrail Clam
4. Indicator Faceplate

Optik Specifications

Optik Glass Cubicle

available upon request.

Glass Specifications

- 10mm clear toughened glass
- 100% RAL 9010 white screen print to rear face (Single sided)
- Screen print fused into the glass during the toughening process
- Edges square polished and corners dubbed

Ironmongery Finish: Satin Stainless Steel as standard.

Colour Selections: Standard Finish RAL 9010 White to rear of glass face (Other RAL colours available subject to quantity)

Special Notes: Outward opening doors complete with back to back Stainless Steel 'D' Handles.

We recommend that outward opening doors open onto an adjacent solid wall to prevent overstrain on hinges.

BIM Objects - Typical Layout

Downloadable BIM Objects

Our BIM Families are a time saving development with fully functional parametric objects. This highly acclaimed 3D model-based process is specifically designed for Infrastructure and Building projects. It offers many benefits to owners that enable simplicity for project management.

- Visualisation of designs
- Simulation of multiple design ideas
- Productivity improvement
- Analysing and testing of application and performance

BIM enables collaborative working; management of information as 'one team' within a digital model holding all the information required to design and construct the project from conception to completion.
