Alaglide[®] Cubicle Range

WASHROOMS FOR ALL ENVIRONMENTS

Alaglide® Cubicle Range

The revolutionary emergency access, space saving solution

Alaglide® is a space saving cubicle range. A larger cubicle entrance provides 25% more usable width compared to conventional cubicles due to no pilaster being required as standard.

In the event of an accident/emergency the inward opening door can quickly and easily be changed to an outward swing motion by a simple two-step latch turn.

Alaglide® solution by Excelsior offers a space saving solution with maximum safety access.

Excelsior's Alaglide® Cubicle Range is the perfect choice for tight spaces. The use of Solid Grade Laminate doors and partitions ensures this system has the highest quality components suitable for all environments. Compared to the traditional swing method the mechanical movement of this system sees the door positioned entirely along one of the two side panels, not taking up any space.

Operating without the aid of hinges and frames the doors roto-translation and sliding action provides a gain of between 36% & 66% in terms of overall available space within the washroom.

A further benefit of this sliding action is, the user does not have to move position to open and close the door which is hugely beneficial to disabled users.

Alaglide® Cubicle range comes complete with a unique emergency exit mechanism, operated with a universal safety key. To ensure maximum safety, the universal safety key allows authorised personnel to enter by releasing the door panel turning it into an outwards-opening swing door. This swift two step method can be performed by a single person ensuring no time is lost should there be an emergency situation.

Adjustable feet from 120/150mm, finger protection seals, external handle and emergency access latch turn keys are additional features with this system.

Aluminium Ironmongery

1. Indicator Faceplate
2. Emergency Release Hinge
3. Adjustable Leg
4. Headrail

Alaglide® Specifications

Alaglide® Cubicle System

Specifications

Doors, Divisions & Panel Specification:

- 12mm Compact Solid Grade Laminate
- Black core radius & polished edge finish

Standard Dimensions:

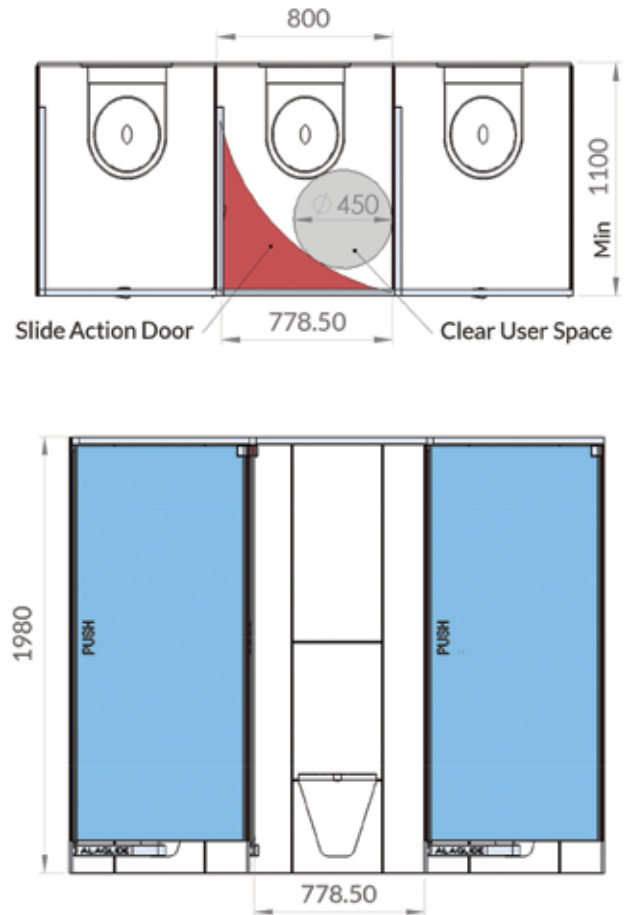

- 1980mm overall height (c/w 150mm adjustable leg) x 1100mm minimum depth, based on 800mm cubicle centres

Polycarbonate/Aluminium Ironmongery:

- Sliding Door Kit -Top and bottom sprung arms
- Leg - Adjustable 120-150mm
- Extruded Aluminium Headrail c/w endcaps
- Continuous Wall Chanel
- Emergency Access Key
- Indicator - Turn & Pull Handle
- Locating Indicator Keep

Toilet Roll Holders & Accessories
available upon request.

Typical Alaglide® Layout

1. Protective overlay for printed decors.
2. Decorative paper on both sides impregnated with melamine resin.
3. Multiple layers of kraft paper impregnated with phenolic resin, to form a rigid exposed core with a radiused, polished edge.

SGL - Compact Solid Grade Laminate

Solid Grade Laminate is extremely resistant to water penetration and impact damage. Nominally 12mm in sheet thickness with radiused and polished solid black edges. Ideal for use in the harshest of environments such as schools and leisure centres.

- Self-supporting Solid Grade Laminate.
- High impact and moisture resistant.
- Machinable throughout its entire thickness. (Black Core)
- Decorative both sides.

Ironmongery Finish: Polycarbonate/Aluminium Ironmongery.

Colour Selections: Excelsior preferred cubicle & washroom colour selection.

BIM Objects - Typical Layout

Downloadable BIM Objects

Our BIM Families are a time saving development with fully functional parametric objects. This highly acclaimed 3D model-based process is specifically designed for Infrastructure and Building projects. It offers many benefits to owners that enable simplicity for project management.

- Visualisation of designs
- Simulation of multiple design ideas
- Productivity improvement
- Analysing and testing of application and performance

BIM enables collaborative working; management of information as 'one team' within a digital model holding all the information required to design and construct the project from conception to completion.
