CASE STUDY

Client: Snowhill Building Three

Contractor: BAM Construction

Architect: Weedon Architects

Location: Birmingham Snow Hill

Completion Date: Q1 2020

Three Snowhill is the final element of the Snowhill Plaza, forming part of Birmingham's 20-year plan to redevelop Snowhill, known as 'Vision 2030', the largest ever speculative city centre office scheme built outside London. Featuring full height windows designed to take full advantage of the city views, and 32,000 square metres of space for office, retail, café and plant space, Three Snowhill stands as a landmark tower in this growing city.

Excelsior have proudly worked alongside BAM construction and Weedon Architects to bring this vision to life. Working to innovative specifications we have fitted out this office space with a combination of Flush 44 Natural Wood Veneer WC Cubicles and Superloos, all complete with stylish solid surface vanities, hidden waste disposal, and boxed out mirrored wall units housing paper towel dispensers.

Building bespoke specifications, we ensure we are delivering exactly what both the customer and specific scheme requires. Here, our bespoke service has allowed for a beautiful high-end installation for optimal use in this landmark business location.
