

Client: The Warner Stand, Lords Cricket Ground

Contractor: BAM Construction

Architect: Populous

Location: London

Completion Date: 2017

The world-famous Lords cricket ground has undergone a huge redevelopment scheme. Phase 1, The Warner Stand, has undergone complete modernisation by Main Contractor BAM and was officially opened by His Royal Highness The Duke of Edinburgh on 3rd May 2017. The refurbishment includes works to the ornate, iconic Victorian Pavilion, with a wing-like roof and fabric canopy; the seating, ensuring maximum visibility for spectators; and the indoor bars and restaurants with panoramic glass windows ensuring the ultimate experience.

Excelsior were delighted to work on this prestigious project with Populous Architects and BAM Construction. Several specifications and finishes were chosen across the project, our Planar 20 in High Gloss being a favourite. The High Gloss laminate created a glass like, reflective finish which opened up the space and made for a truly show stopping installation. Designer White Solid Surface tops, and Stainless-Steel finishes were also used to dramatic effect across the scheme.
