washrooms for all environments

CASE STUDY

Client: Omicron

Contractor: Pave Aways

Architect: Pinnegar Hayward Design

Location: Stafford

Completion Date: September 2017

Specified by Pinnegar Hayward Design, Excelsior's Flush 30 Cubicle system has been installed in the State of the Art, brand new OMICRON Service & Training Centre. The £2m Headquarters located just off the M6, J14 provides an inspiring environment for both staff and clients.

Flush 30 Range offers a contemporary, flush fronted facade that sits perfectly within the modern interior of the building. Finished in a neutral palette with a splash of colour on the Duct Panels coheres beautifully with the colourful illuminated exterior.

Built by Pave Aways, the building was handed over to a very happy client in September 2017.
