washrooms for all environments

CASE STUDY

Client: Opus Energy Ltd

Contractor: Overbury Central Unit

Architect: Northampton Building Consultancy

Location: Northampton

Completion Date: September 2017

Following Opus Energy's momentous growth over its 15-year history, their move to the John Dryden House will consolidate their four current sites and house all employees working in Northampton under one roof.

With the new premises, Opus Energy expects to have an almost 800 strong Northampton workforce, highlighting its prominence as a key local employer. The refurbishment of the property has seen state of the art facilities, and with investment into sustainability opportunities, will enable the business to be carbon neutral.

We are very proud to have worked alongside Overbury to complete this project, using our bespoke Select Range.
