

The Project – Three Trees Community Centre

Renovation of the community centre has been made possible with the support of funders, volunteers, local businesses and charitable trusts.

Around £1.2m has been raised to repair, refurbish and extend the building.

The centre will cater for the needs of the positive, vibrant and diverse community coming through the doors.

The Challenge

The project was managed by the church and community inclusion was a key driver on this project.

Parishioners, local businesses and the community on the whole are extremely proud of their roots and keen to celebrate them.

The local woodland was chosen for the finish on the cubicles and photographs were taken and used to create a digital laminate.

The challenge for the photographer was getting the right shot. The washroom space is actually quite small in the centre.

The Solution

The diversity of the community enabled the centre to be creative when designing the washrooms and drawing on the beauty of the local area they decided to install not only a Grade A system but chose a serene digital print which is both innovative and thought provoking.

The inspired woodland theme has created a talking point amongst the patrons and is admired and loved by all.

Feedback from the client:

“It's also worth a day out just to visit our toilets, after decades of nastiness we are proud to have the finest toilets for miles around! We love them loos!”
