washrooms for all environments

The Project - Fernwood Caravan Park

A beautiful caravan park set in the rural county of Shropshire, full of unspoiled countryside, lakes, woods, and breath-taking views.

Complete refurbishment to modernise the Ladies and Gents toilet blocks.

The Challenge

Propose a robust system suitable for an area subject to high levels of moisture and traffic.

Provide a system with clean lines and easily wipeable surfaces.

Working within a small space create a vanity to optimise the user experience. Provide a generous counter to comfortably hold the user's washbag and other essentials whilst they are using the facilities.

Include space for mirrors, soap dispensers with lighting fitted into a bespoke bulkhead to ensure the user has enough light to enjoy the space.

The Solution

Solid Grade Laminate (SGL) has been used on the entire project. SGL is a self-supporting material providing high levels of durability which is impervious to water penetration. SGL is available in large sheet sizes which proved to be a perfect solution for this project having been used to clad some of the walls to create clean lines and wipeable surfaces.

A profiled end panel to the vanity opens the space and eliminating the pinch point at the entrance to the cubicles.

Did you know that 80% of bacteria is transmitted by contact between hands and contaminated surfaces?

High Pressure Laminate and Solid Grade Laminate has built-in Antibacterial Protection as standard, which eliminates 99.9% of bacteria within 24 hours and prevents the build-up of mould and mildew.
